

ENVIRONMENTAL & SOCIAL SUSTAINABILITY POLICY

SCP Redmond Hotel is primarily a leisure hotel destination with 49 guest rooms, Provisions Market offers locally sourced and wholesome snacks and beverages, The Rooftop Restaurant offering a locally inspired small plate menu, along with handcrafted cocktails featuring herbs, fruit, and spices grown amidst The Rooftop's own gardens, Terra Kitchen, a true field-to-table restaurant offering a field-to-table restaurant offering a locally-grown and locally-sourced plant-based dining experience, Wayfarer Club featuring tavern-style small plates and hand-crafted cocktails and designed for locals and guests alike, SCP Fit offering flexible space with Peloton Bikes, TRX, yoga mats, weights and more, and SCP Commons, outfitted with environmentally friendly furniture, high-speed Wi-Fi, private conference rooms and plenty of locally sourced coffee.

Redmond is a city in Deschutes County, Oregon, United States. Incorporated on July 6, 1910, the city is on the eastern side of Oregon's Cascade Range, in the High Desert in Central Oregon.

We are committed to achieving best-practice environmental and social sustainability and has partnered with EarthCheck, the world's leading Benchmarking and Certification provider.

It is recognized that the health and well-being of the environment contributes to the health and well-being of our employees and the communities and populations we serve. Therefore, we commit to providing leadership within the field of sustainable hotel management by example and through the sharing of knowledge and expertise.

Earth Check certification will be the vehicle by which we manage our operations. We further commit to pursue the U.N. Sustainable Development Goals 2030 that we have direct control over, and/or can influence through community engagement.

This policy is aligned with the purpose, values, and governing principles of sustainable development. In delivering this commitment, our leadership and staff will actively participate and communicate our economic, social, and environmental progress and will undertake the following:

- Appoint a member of staff as the responsible party for the oversight of this policy
- Provide all employees with the necessary training to ensure that personnel are aware of the need to identify risks and to respond properly
- Comply with all relevant environmental, social, cultural, quality, energy, and health and safety laws, regulations, and permits, with specific consideration of heritage and archaeological significance
- Regenerative best practices will be sought when making environmental decisions Conduct annual internal audits and reviews to ensure that all managed operations remain compliant with the sustainability policy
- Conserve natural resources by ensuring the responsible use of energy, water, and minimizing waste
- Targets will be set annually for reducing energy, water and waste, and a tracking system of consumption and GHG emissions will be monitored and measured for determining outcomes Habitat protection and regulatory compliance is assured when developing properties.
- Noise on property will be minimized to not affect the comfort of those on property, or the effect it may have on the local community, or wildlife in the vicinity
- Light emanating from the property will not adversely affect persons or wildlife Zero captive wildlife

will be held on property

- No artifacts, souvenirs or products are offered for sale or consumption of any protected species or conservation concern
- A sustainable purchasing policy will assist us in sourcing services and products with minimal environmental impact, including, where appropriate, the purchase of local, recyclable products, reduced packaging and shipping components, energy efficient equipment, and priority consideration will be given to those suppliers with fair trade practices
- Communicate policy to all stakeholders using a variety of avenues
- Take into consideration the results of stakeholder engagements, the needs of supply chain organizations, and end users
- Work with suppliers and contractors to ensure that they are informed of our policies and expectations for environmental management
- Take into consideration legacy issues and document those positive aspects of our operations and activities
- Encourage companies, especially large and transnational companies, to adopt sustainable practices and to integrate sustainability information into their reporting cycle, through a supply chain management program
- Economic growth will never be at the expense of environmental degradation
- We will participate, as appropriate, in community forums or other activities that promote environmental, social, and cultural issues
- We will respect and contribute to the protection of historical, archaeological, culturally, and spiritually important sites, and will not impede access to them
- Cultural engagement will be part of our external stakeholder engagement process No basic services to the local community will be negatively affected by our presence. Priority will be given to the local community for employment opportunities

This policy shall be documented and made available to all stakeholders via company website, integrated into the company's internal SOP manual, and shall be reviewed annually and updated as needed for the purpose continuous improvement.
